Ideas

1. R CMD check

2. Testing best practices

3. pkgdown site

4. Anything else!

Testing best practices

1. usethis::use_testthat(3)

2. Activate parallel testing

3. Align names of R/ and test/ files (?use_test)

4. Refactor your tests (top-level and duplicated code)

5. Increase code coverage with snapshot tests, mocking etc.

Build and preview a local pkgdown website

1. use_pkgdown();
   pkgdown::build_site()

2. _pkgdown.yml reference/articles

3. use_readme_rmd()

4. Theme it

Anything else

1. Why does this function feel hard to use?

2. How can I make this function faster?

3. How can I improve this test?

4. What's missing from this documentation?

5. Is there a simpler way to solve this problem?

6. Can you help me fix this bug?

7. Why doesn't my github action doesn't work?
